BOSCH
Invented for life

“It has always been an unbearable thought to me that someone could inspect one of my products and find it inferior in some way. For that reason I have consistently tried to produce products which can withstand the closest scrutiny – products which prove themselves to be superior in every respect.”

Robert Bosch 1861-1942

reddot design award winner 2010

With more than 12,000 submissions from more than 60 countries, the international red dot design award is the largest and most renowned design competition in the world. Bosch has won 27 red dot awards, look out for the above logo against the relevant award winners.

award

2010

The International Forum (iF) design awards are one of the most challenging design competitions in the world, and the iF product design award is recognised as a label for good design. Products entered are stringently evaluated for quality of design and materials, innovation, environmental sustainability, functionality, ergonomics, safety and longevity. Bosch has won more than 46 of them.

To help you choose the right Bosch appliance for your needs we have divided our appliances into four groups:

Logixx

Our premium range, with exceptional cutting-edge features and extras. Machines offer electronic controls, large LED displays and touch controls. The range includes whisper-quiet 8kg washing machines with a revolutionary new brushless motor, the world's most energy efficient tumble dryer, a dishwasher that can accommodate 14 place settings and refrigeration products with advanced food preservation technologies such as a SuperCool and MultiAirflow Cooling.

Exxcel

Mid-range models with a broad range of extra features and benefits. Large easy-to-use LED displays are common and selected products offer electronic controls. You will find the water efficient Exxcel 7 ActiveWater™ washing machine with intelligent water management system which ensures that not a single drop of water is wasted, dishwashers that can wash up to 13 full place settings using as little as 6.5 litres of water, and refrigeration models that mean you never have to worry about defrosting your fridge or freezer again.

Avantixx

Added value models with a good selection of features at a good price. Offering simplified LED displays and manual controls. Look out for 6kg washing machines with convenient Reload function, 12 place setting dishwashers with an Auto 55-65°C programme and a handy half load option and exceptionally energy efficient refrigeration products including seven A++ fridge freezers that use 40% less energy than an equivalent A-rated model.

Classixx

Simple practical models offering Bosch build quality and value for money. Straight-forward, brilliantly easy to use, and with the highest quality materials used throughout, our Classixx range of appliances offer great home laundry, dishwashing and refrigeration on a budget, but without compromise.

Technologies that not only improve our daily life, but our future as well.

Bosch is constantly guided by this principle, from environmentally-friendly production methods to researching new, energy-efficient technologies.

Our environmental pledge

We set ourselves very strict guidelines, and in the majority of cases these exceed statutory regulations. This environmentally friendly approach is adhered to throughout the entire design and manufacturing process. Wherever possible we use recyclable plastics, and label all plastic parts so they can be easily sorted and disposed of in an environmentally friendly manner. We make considerable energy savings through heat recovery and energy supplied on demand, and we avoid harmful emissions and effluents by using effective filtering and purification systems. You can rest assured that when we are developing new appliances we are both keeping pace with your demands and meeting our principles of protecting the environment.

The symbol for sustainability and energy efficiency.

To differentiate our appliances and help you identify our most energy efficient models we have introduced a 'Green Technology Inside' symbol. This symbol highlights products that feature groundbreaking technologies, which achieve maximum performance while being extraordinarily economical in their use of energy and natural resources.

Make the right environmental choice.

Backed by groundbreaking technological innovations, Bosch develops some of the world's most economical and efficient home appliances.

Our refrigeration products are among the most economical in the world. Unlike your washing machine or dishwasher, your fridge or freezer is on 24 hours a day, so it is especially important that it does not waste energy. Every model in the Bosch range has been awarded at least an A+ energy rating and seven super-efficient models have been awarded A++, using 40% less energy than equivalent A-rated models.

ActiveWater

Our ActiveWater dishwashers

dramatically reduce both water and electricity consumption – using 6.5 litres

of water on the Economy 50°C programme and only 0.92kWh electricity to wash 13 place settings. Compared to a staggering 49 litres of water if you washed-up the same load by hand. All our dishwashers are at least A+ rated, and our AquaStar dishwashers are all an extra-efficient A++ rated under the EU energy rating system.

This year sees the introduction of our first ever ActiveWater washing machine. The built-in intelligent water management system guarantees that exactly the right amount of water is used for the load - not a single drop of water too much or too little. This reduces water consumption to just 42 litres for a 7kg load. And it's so energy efficient that it carries a top class A+++ energy rating.

Energy efficiency labelling scheme

To help you choose the most energy efficient appliances, the EU has introduced an energy-rating scheme and all appliances must display an EU Energy Label. Cooling and dishwashing classifications are newly updated for 2011. To reflect technological advances in energy efficiency the old A to G system is now updated to 'A+++' for the most efficient appliances, and 'D' to reflect the least efficient. In addition, the annual consumption for water and noise level will be displayed for the first time.

Bosch Logixx and Exxxel washing machines are also updated to the new EU A+++ to D ratings.

Bosch Avantixx and Classixx washing machines, plus all tumble dryers will still adhere to the pre-2011 ratings system whilst a period of change-over is put in place.

Look out for the new EU energy label in store.

Refrigeration and Freezers

- 1 Supplier's name or trademark and model identifier
- 2 Energy efficiency class
- 3 Annual energy consumption in kWh (based on standard test results for 24 hours)
- 4 Noise emissions in decibels
- 5 Sum of storage volume of all frozen-food storage
- 6 Sum of storage volume of all storage compartments without a star-rating
- 7 Numbering of the regulation

Dishwashers

- 1 Supplier's name or trademark and model identifier
- 2 Energy efficiency class
- 3 Annual energy consumption in kWh (based on 280 standard cleaning cycles)
- 4 Acoustical noise emissions
- 5 Capacity in standard place settings
- 6 Drying efficiency class
- 7 Water consumption in litres per year (based on 280 standard cleaning cycles)
- 8 Numbering of the regulation

Washing Machines
(Logixx and Exxxel only)

- 1 Supplier's name or trademark and model identifier
- 2 Energy efficiency class
- 3 Annual energy consumption in kWh (based on 220 standard wash cycles per year)
- 4 Acoustical noise emissions in decibels during the washing and spinning phases, for the standard 60°C cotton programme at full load
- 5 Spin-drying efficiency class
- 6 Capacity in kilograms
- 7 Water consumption in litres per year (based on 220 standard washing cycles)
- 8 Numbering of the regulation

Limited edition showstoppers.

Stand out from the crowd and make a real style statement with our trendsetting limited edition black and silver finish appliances, available throughout home laundry, dishwashing and refrigeration.

Home laundry.

Logi**xx**

Our premium range, with exceptional cutting-edge features and extras. Like our whisper-quiet 8kg washing machines with revolutionary EcoSilence motor and Anti-Vibration Design. They also feature the new VarioPerfect wash system, saving up to 30% more energy or offering 60% faster wash times. You'll find one of the world's most energy efficient tumble dryers, and a washer dryer that can wash and dry a 4kg load in one go.

Ex**xx**cel

Mid-range models with a broad range of extra features and benefits. Generous 7kg capacity washing machines, featuring the VarioPerfect wash system, giving the option to save energy or speed up wash times. Includes the incredibly water efficient Exxxcel 7 ActiveWater washing™ machine with intelligent water management system which ensures that not a single drop of water is wasted. And, our groundbreaking Exxxcel 8 Steam dryer with ActiveSteam technology, which practically eliminates the need for ironing.

Avant**ixx**

Added value models with a good selection of features at a good price. Offering simplified LED displays and a wide range of programme options designed for today's lifestyle, like Mixed Load and Super Quick 15. Washing machines feature a convenient Reload function and the new VarioPerfect wash system, saving up to 10% more energy or offering 60% faster wash times.

Class**ixx**

Simple practical models offering Bosch build quality and value for money. They still feature the new VarioPerfect wash system, saving up to 10% more energy or offering 60% faster wash times. There are tumble dryers with sensor electronics for efficient drying and a slimline washing machine for when space is at a premium.

Perfection just got better.

Bosch VarioPerfect™ washing machines let you decide whether you need your laundry quickly or more economically, giving you ultimate control over your time and money. And, as you would expect from Europe's No. 1 washing machine manufacturer, our machines also deliver perfect laundry every time.

Logixx 8 VarioPerfect™ highlights

EcoPerfect can save you up to 30% more on your electricity bill.

Our new VarioPerfect™ system gives you an EcoPerfect option, which uses up to 30%* less energy than the qualifying rate for energy efficiency class A.

SpeedPerfect gives you perfect washing up to 60% faster.

Our new VarioPerfect™ system gives you a VarioSpeed option, which reduces programme times by up to 60% – perfect for when speed is of the essence.

Outstanding performer.

Our EcoSilence Drive™ is an advanced motor offering maximum efficiency, economy, durability, performance and exceptionally quiet operation.

Whisper-quiet.

In addition to the new EcoSilence Drive™, we have also redesigned the structure of our washing machines. Our new AntiVibration Design™ reduces noise even further to give you a whisper-quiet machine.

Unique SoftSurge™ drum system.

Thanks to the asymmetric paddles, raindrop design drum surface, advanced water flow system and porthole design our machines deliver faster, better and gentler washing of your clothes.

Range of special programmes

Because every garment is different we have designed a whole range of individual care programmes to make sure you get the best results every time e.g. Sports Wash, Delicates Silk, Dark Wash.

*30% more economical (only 0.13kWh/kg) than the qualifying rate (0.19kWh/kg) for energy efficiency class A.

The best energy efficiency class is A+++. 30% better than A.

Thanks to the new VarioPerfect™ system, the EcoPerfect option can save you up to 30%* more on your electricity bill. It can be combined with practically every programme for energy-efficient washing and perfect results.

*30% more economical (only 0.13kWh/kg) than the qualifying rate (0.19kWh/kg) for energy efficiency class A.

Select the EcoPerfect option and save up to 30% more energy.

With a full 8kg load, the Logixx 8 VarioPerfect™ is 30% more economical than the qualifying rate for energy efficiency class A. The EcoPerfect option can be combined with all programmes except Super Quick 15 and Wool. Making a difference to your pocket and the environment has never been so easy.

Reduced water and energy consumption thanks to sensor electronics.

The days of loading the washing machine to full capacity to save on electricity are over – thanks to our automatic load sensing system. It detects how much washing is in the drum and makes sure that just the right amount of water and energy is used. That way, even smaller quantities can be washed with maximum energy efficiency. So, for instance when you wash a 4kg load of laundry you only use the electricity and water required for 4kg, and not any more.

Our Logixx 8 VarioPerfect™ and Exxcel machines will even tell you when excess foam caused by detergent overdosing is detected.

60% faster washing, 100% satisfaction.

Thanks to the new VarioPerfect™ system, SpeedPerfect gives you the fastest wash option ever. With no compromise on performance, it washes gently and thoroughly, giving you a perfect wash in less than half the time.

Select the SpeedPerfect option and reduce wash times by up to 60%.

Depending on the programme selected you can reduce wash times by up to 60%. So, for example a 5kg load of cottons washed at 40°C in our new Logixx 8 VarioPerfect™ machine will take only 60 minutes. The SpeedPerfect option can be combined with all programmes except Super Quick 15 and Wool.

EcoSilence Drive™

Developed by Bosch, this revolutionary brushless motor is quieter, faster, more energy-efficient, durable and powerful than all others before it. Utilising the same advanced technology used in efficient machines such as wind turbines the EcoSilence Drive™ achieves maximum power with minimum energy loss.

More efficiency

Thanks to its innovative design, the EcoSilence Drive™ is 35% more efficient than a standard motor.

More energy-efficient

The EcoSilence Drive™ uses up to 30% less energy than the qualifying rate for energy efficiency class A.

More time-saving

With its outstanding efficiency factor, the EcoSilence Drive™ takes less time to achieve peak performance.

Ssh...

Our new EcoSilence Drive™ makes the Logixx 8 VarioPerfect™ the fastest, most effective and energy-efficient Bosch washing machine ever. And combined with our new AntiVibration Design™ it's the quietest machine we've ever built too.

More durability

The design of the EcoSilence Drive™ means very low wear and tear and a long life expectancy.

Less noise

The EcoSilence Drive™ is a brushless motor, which means that high-frequency motor brush noise is eliminated. The drive is also fully encapsulated which prevents dirt from entering and creating noise.

AntiVibration Design™

We have redesigned the structure of our washing machines; the spiral design of the sidewalls increases stability and reduces vibrations. Improved sound insulation and low noise shock absorbers dampen noise further giving you a whisper-quiet machine.

We take the chore out of laundry.

As Europe's No.1 washing machine manufacturer, you can rest assured that when it comes to laundry we've thought of everything.

Unique SoftSurge™ drum system

Gives better cleaning results, as well as providing greater protection for your washing. The asymmetric paddles and raindrop drum surface design provide power for those heavy-duty jobs, while being gentle on your clothes. The advanced Water Flow System distributes the water and detergents more efficiently throughout the wash, and reduces soaking time. Add to this the new moulding of the window glass that guides your laundry towards the centre of the drum, avoiding snagging of small items between the glass and the door seal, and you have the new state-of-the-art SoftSurge™ drum system; efficient, gentle and time saving.

Digital displays

All our Exxcel 7 and Logixx 8 VarioPerfect™ washing machines feature large displays that clearly show the wash progress, time remaining, spin speed and temperature selected.

Less creasing

With a drum size of up to 8kg, creasing is minimal even for large loads, as there is plenty of room for garments to move freely.

Reload

We've all done it – left a sock on the stairs, then realised it's too late because the wash cycle's started. Or perhaps you've put a red garment into a white wash by mistake. With our Logixx 8, Exxcel 7 and Avantixx 6 VarioPerfect™ machines, the problem's solved. The pause option allows you to open the door early in the cycle to add (or remove) the offending item.

Aqua Plus

A higher water level is used throughout the wash and rinse cycles of the chosen wash programme – for best rinsing results.

VarioPerfect™

Available on all Bosch washing machines, VarioPerfect™ lets you decide whether you need your laundry quickly or more economically. EcoPerfect saves an additional 20 or 30% more energy and with SpeedPerfect you have the option to wash your laundry up to 60% faster. And, as you would expect from Europe's No. 1 washing machine manufacturer our machines also deliver perfect laundry every time. (See pages 17-23 for more details.)

Self-cleaning detergent drawer

The self-cleaning detergent drawer has smooth walls and jet-sprays in each corner that automatically flush the detergent chambers clean. So that there is no sludgy residue left in the drawer at the end of the wash.

Multisafe

All Bosch washing machines are designed with safety in mind, from the highly pressure-resistant water supply hose and overflow prevention systems, to the electronic lock that prevents the porthole from being opened unintentionally mid-cycle.

Perfectly tailored to suit modern fabrics and lifestyles.

Because every garment is different we have designed a whole range of individual care programmes to make sure you get the best results every time.

Cottons

An intensive programme with a temperature range up to 90°C and a fast final spin.

Easy Care

Designed for synthetic fabrics, which absorb minimal moisture and dirt. A range of temperatures up to 60°C and a gentle spin from 800rpm to 1200rpm ensures maximum care of all your laundry.

Mixed Load

A fast wash that allows mixed fabrics and colour loads to be safely washed together. Originally designed with school uniforms in mind, it is capable of handling up to 3kg of washing, and is ideal for quick washes.

Delicates / Silk

An especially caring programme with a gentle wash action. Intermediate spinning in the rinse cycle is omitted, and a gentle final spin at 600 rpm completes this delicate programme.

Wool

An exceptionally gentle woollens handwash programme, which runs at only 27 rpm (usual speed 50 rpm) with a soft wash action and special spin phase that ensures that everything stays in good shape.

Dark Wash

Designed specifically for dark clothes, and available across a range of temperatures, this programme reduces fading, and ensures no flecks of washing powder remain on your clothes at the end of the wash.

Sportswear

A programme for modern sports clothes with sportswear microfibre technology like those used for gym, cycling or jogging.

Super Quick 15

A short programme of approximately 15 minutes for 2kg of lightly soiled washing – that's roughly equivalent to one outfit or 10 men's shirts. Packing in a wash, two rinse cycles and improved rinse spinning, this is one of the shortest complete washing programmes of any machine on the market.

Reduced ironing

The laundry is tumbled gently periodically during the normal programme spin cycle, and then again at the end of the spin phase, keeping laundry fluffy and tangle free. The result is reduced creasing, and therefore easier ironing.

Prewash

Thanks to VarioPerfect™ all our wash programmes are improved giving you the best possible wash performance. However, we appreciate that sometimes items are particularly dirty, which is why we have included a Prewash option on our Cottons and Easy Care programmes.

Night wash

Designed to be quiet running for night use. Based on 4kg mixed load programme with an 800rpm final spin and using gentle dry mode.

Sensitive

By prolonging the maximum wash temperature, increasing the water level, and adding an extra rinse, this programme reduces exposure to allergens that irritate sensitive skin.

Counts every drop because every drop counts.

The new Exxcel 7 ActiveWater™ washing machine is incredibly water efficient. Only the exact amount of water – to the last drop – is used every time you load your washing machine, whether you put in one t-shirt or a full 7kg load.

Intelligent water management

Water is a precious resource and one that we must all use as sparingly as possible. To help you do this, Bosch engineers have come up with ActiveWater™ – the most intelligent water management system ever. The flow sensors are so accurate that each load is ‘assessed’ individually. Only the exact amount of water is used for any load, and it is continuously adapted throughout the cycle so that not a single drop of water is wasted.

Most sophisticated sensors ever

Our new VarioPerfect™ system gives you a VarioSpeed option, which reduces programme times by up to 60% – perfect for when speed is of the essence.

Advanced textile care

The new “wave” drop-design drum means just the right amount of gentle textile agitation for a perfect wash. In addition, the optimised paddle and drum design makes for precise textile movement, constant water flow and equal detergent distribution for perfect results every time.

VarioPerfect speed or economy – your choice

VarioPerfect™ lets you decide whether you need your laundry quickly or more economically. EcoPerfect saves an additional 20 or 30% more energy and with SpeedPerfect you have the option to wash your laundry up to 60% faster.

Whisper quiet

The clever spiral design of the sidewalls increases stability and reduces vibrations. Improved sound insulation and low noise shock absorbers dampen noise further, giving you a whisper quiet machine.

The perfect solution to British weather. A tumble dryer that uses 40% less energy.

Thanks to the innovative heat pump technology, the Bosch EcoLogixx 7 tumble dryer uses over 40% less energy than a standard A-rated dryer, and is the first tumble dryer in the world to consume less than 2kWh for a standard programme. A brilliant innovation that means no more wet weekends for you.

How do condenser dryers work?

Condenser dryers collect the condensed water vapour that occurs during the drying process in an easy-to-access container. As a result they do not require an external wall vent, and you can position them anywhere in your home.

Revolution drying

Our condenser dryers have an airflow system that, combined with the unique drum and paddle action, creates an exceptionally efficient and caring drying environment. The large drums with unique textured surfaces ensure greater care of even the most delicate fabrics, improving the airflow and keeping the laundry raised from the surface of the drum. Archimedic style paddles gently bring laundry forward as well as around the drum, resulting in even drying, greater fabric care and less creasing.

Automatic Self-Cleaning System

For a tumble dryer to run at peak efficiency, the condenser has to be kept clean of lint, which has traditionally meant washing the condenser by hand. The ground-breaking Automatic Self-Cleaning System means the water extracted during the drying cycle is used to flush the condenser, removing the lint that would otherwise reduce its efficiency. So the EcoLogixx 7 will deliver a better than A-rated performance, every time, without you having to do a thing.

Sensor drying

Throughout the drying cycle, advanced sensor electronics monitor your laundry, preventing overheating and automatically stopping once your garments reach the desired level of dryness.

Super Quick 40 minute programme

A shorter programme of approximately 40 minutes for lighter loads of up to 2kg – roughly equivalent to ten business shirts – with sensor control to ensure great drying results.

Anti-crease cycle

Bosch dryers feature an anti-crease programme to reduce the burden of ironing. A gentle drum action automatically separates and smoothes your garments for up to 60 minutes on standard dryers, or 120 minutes for models with the reduced ironing option, to keep them wrinkle-free and ready-to-go.

Low heat

An innovative feature that protects sensitive textiles by reducing the heat in the final stage of drying, and extending the drying time. The EcoLogixx 7 condenser dryer goes even further with its super-delicate drying feature. This reduces the temperature by 10°C throughout the drying cycle.

LC Display

The liquid crystal display on the EcoLogixx 7 and Exxcel Steam 8, keeps you in touch with the progress of your laundry. Select the end time and you will know precisely when your clothes will be ready. It also gives you the freedom to select additional options to enhance the drying process.

Say hello to the new steam dryer from Bosch And goodbye to 10 days of ironing a year!

The innovative Exxcel 8 Steam dryer from Bosch uses ActiveSteam technology to dry your laundry, which practically eliminates the need for ironing and gives you the option to refresh dry clean only garments.

Exxcel 8 Steam highlights

Crease-free laundry means more free time for you.

The average household spends over 10 days a year ironing. The new Exxcel 8 Steam uses ActiveSteam technology to dry your laundry, which practically eliminates the need for ironing. Shirts come out of the dryer crease-free and ready to go on the hanger.

Save yourself a trip to the dry cleaners.

The refresh option removes odours and reduces creasing, ideal for dry clean only items such as suits and jackets that have already been worn and just need freshening-up.

Fully automatic

The Exxcel 8 Steam is simplicity itself to use as all programmes are fully automatic. The machine automatically detects how damp the clothes are and adjusts the amount of steam generated for the best possible results. Sensors then continually monitor the progress of the laundry making adjustments where necessary.

Maximum care

The Exxcel 8 Steam with easy-iron and refresh modes: dries, removes creases and gets rid of odours from up to 8kg of clothes. The steam function can be used with dry or damp clothes giving you maximum flexibility. And, the combination of steam, our unique drum and paddle design and advanced sensors ensure the best possible care of your laundry.

Vented dryers with outstanding features

Bosch vented dryers care for your clothes with a range of clever features. Sensor drying, archimedic style paddles and a low heat option mean that your clothes are beautifully cared for throughout the drying process and will never be over-dry.

How do vented dryers work?

Vented dryers exhaust the water vapour through a pipe at the back of the dryer, which must ventilate directly into the open air through an outside wall vent.

The 'Revolution' drying system

Our vented dryers have an airflow system that, combined with the unique drum and paddle action, creates an exceptionally efficient and caring drying environment. The large drums with unique textured surfaces ensure greater care of even the most delicate fabrics, improving the airflow and keeping the laundry raised from the surface of the drum. Archimedic style paddles gently bring laundry forward as well as around the drum, resulting in even drying, greater fabric care and less creasing.

Sensor drying

Throughout the drying cycle, advanced sensor electronics monitor your laundry, preventing overheating and automatically stopping once your garments reach the desired level of dryness. Fibre damage caused by over-drying becomes a thing of the past, and there is no excess energy consumption.

Low heat

An innovative low heat feature that protects temperature-sensitive textiles by automatically reducing the heat in the final stage of drying, and extending the drying time.

Super Quick 40 minute programme

A shorter programme of approximately 40 minutes for lighter loads of up to 2kg – roughly equivalent to ten business shirts – with sensor control to ensure great drying results.

Anti-crease cycle

Bosch dryers feature an anti-crease programme to reduce the burden of ironing. A gentle drum action automatically separates and smoothes your garments for up to 60 minutes to keep them wrinkle-free and ready-to-go.

Fluff filter indicator

There is no need to check the fluff filter as indicators on the fascia panel will remind you when it's time to empty it.

Half the water consumption. Twice the amount of laundry.

The new Logixx washer dryer from Bosch not only uses half the amount of water as a standard washer dryer, but it can also wash and dry almost twice the amount of laundry in one go.

Highlights of the new Bosch Logixx washer dryer

Half the water consumption.

The new Bosch Logixx washer dryer uses just 51 litres of water to wash and dry a 4kg load, compared to a standard washer dryer that uses more than twice as much. A standard washer dryer works by passing cold water over the drum, this condenses the steam in the damp clothes to water which is then pumped away. The new Logixx washer dryer features air condensation technology which is similar to that incorporated in our condenser tumble dryers, and uses air rather than water to dry your clothes.

Twice the amount of laundry.

The maximum drying capacity of a standard washer dryer is 2.5kg. The new Logixx can wash and dry up to 4kg of laundry in one go, which is equivalent to 18 shirts or 30 T-shirts. And if you're just using one of the wash programmes you can wash up to a hefty 7kg of laundry.

Save time and energy too.

We're continually striving to make our appliances the most environmentally friendly available. Not only does the new Logixx tumble dryer use only half the amount of water compared to a standard machine, but it's also much more energy efficient. And since you can wash and dry 4kg in one go, you'll have more time to get on with the more exciting things in life.

Easy to use

The self-cleaning condenser system automatically flushes away any lint or fluff so there is nothing for you to clean. It also means that the machine runs at maximum efficiency at all times and ensures its long-term reliability. The AutoDry function uses advanced sensors to monitor your laundry ensuring perfect drying results every time. And its large LED display and touch controls make operating the machine effortless.

Complete ironing solutions.

Whether you need to handle a couple of shirts or a week's worth of family washing Bosch has the perfect iron for you: from super-fast steam stations, to traditional steam irons. For a brochure of our complete range of irons and small appliances please call 0844 892 9023.

Advanced Steam System

This feature gives you better steam distribution and an overall 60% bigger contact area between steam and fabric*, which means you'll spend less time removing creases.

Steam output

Features range from water spray and vertical shot of steam, to continuous steam output of up to 40 g/min so you can cope with anything from crease removal to freshening hanging items such as curtains and jackets. All irons have variable steam, giving you complete control.

Soleplates

Bosch irons have superb glide and scratch resistance for ease of use, whichever model you buy. The Inox Glissée soleplate is a specially coated stainless steel. The Palladium Glissée is an easy glide ceramic soleplate.

Anti-calc system

The built-in resin filter in the water tank automatically reduces water hardness and prevents the build up of limescale, increasing your iron's life. Even in a relatively hard water area you can use it straight from the tap.

Drip-stop system

Automatically shuts off the water supply to the soleplate until the iron is hot enough to produce steam, avoiding accidental drips onto your clothes whilst ironing.

Auto shut off

A built in safety system for complete peace of mind. Auto shut-off switches the iron off after 30 seconds if it is left face down, or after 8 minutes if left standing – so it doesn't matter if you get called away or forget to switch it off.

*TDA56 compared to TDA8 soleplate design.

NB: Not all models have every feature – refer to individual specifications for full details.

Steam generators.

The Bosch Professional steam generators offer top of the range features to help you speed through your pile of ironing. They all offer a continuous refill system, super fast heat up, high steam outputs and premium soleplates. Not only will your clothes receive a professional finish, the steam generators look fantastic too.

TDS3569GB – PREMIER POWER
The most powerful steam generators in the world.*

2800	130g	1.4L
watts	steam	capacity

TDS3540GB – PREMIER PROTECT *design*
The steam generator with an extra soleplate cover, to protect delicate fabrics.

2800	130g	1.4L
watts	steam	capacity

TDS2569GB – PROFESSIONAL POWER
The most powerful steam generators in the world.*

2800	120g	800ml
watts	steam	capacity

TDS3530GB – PREMIER ECO
The Bosch steam generator with an ECO button –saves up to 25% energy.

2400	130g	1.4L
watts	steam	capacity

TDS2511GB – PROFESSIONAL PLUS
An all round high performance Bosch steam generator.

2400	110g	800ml
watts	steam	capacity

TDS2561GB – PROFESSIONAL
Another first class Bosch steam generator.

2400	110g	800ml

* Based on wattage at time of publication,TDS3569GB and TDS2569GB only.

Steam irons.

Every model in the Sensixx range has all the features you would expect in a top-of-the-range iron, so you can cope with anything from crease removal to freshening hanging items such as curtains or jackets, or even seating pleats. All irons have variable steam too – giving you complete control of steam output for the task in hand.

TDS1135GB – STEAM GENERATOR IRON

The most powerful irons in the world*. This compact but powerful steam generator iron can pump large amounts of consistent steam thanks to its internal motor. The powerful 200g/min shot of steam can tackle the very toughest creases and is easy to store.

TDA7640GB – PREMIER POWER

The most powerful irons in the world*. This iron is exceptionally quick and easy to use. With an amazing 180g/min shot of steam to eliminate the most difficult creases. It also comes with back filling for extra ease of use.

TDA3640GB – PROTECT PLUS

The only family of irons with two soleplates†. This iron has a special clip on protect soleplate cover which means that you need never worry about shiny patches on your dark clothes again.

TDA5630GB – ECO

The energy saving iron. This iron saves energy thanks to its Eco setting which allows you to choose the most efficient setting for your ironing needs. It also has auto shut-off for further energy saving and safety for complete peace of mind.

TDA5620GB – POWER II

The most powerful irons in the world*. This iron has an incredible 2750W of power which means an extra quick heat up time and optimum steam output. Speed through your ironing with this agile iron.

TDA5610GB – ALL STAR II

A fantastic all round iron. This iron has all the features you would expect from a Bosch iron including great steam output, drip stop and an anti-calc system.

* Based on wattage at time of publication, TDS1135GB, TDA7640GB and TDA5620GB only.

† TDA3640GB only.

Water pressure required: 1-10 bars, flow rate 8 litres per minute.

Bosch does not recommend connecting your washing machine to an artificial water softening unit since this could adversely affect the performance of the washing machine.

All models comply with COMMISSION REGULATION (EC) No 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption.

Data in this table valid as of April 2011. Subject to modification without prior notice.

BOSCH

Dishwashers.

Logixx ActiveWater

Our premium range, with exceptional cutting-edge features and extras. The quietest and most water efficient dishwashers in the world, thanks to EcoSilence and ActiveWater technology and features 3 automatic wash programmes, as well as the unique Blue VarioDrawer, taking it to 14 place settings.

Exxxcel ActiveWater

Mid-range models with a broad range of extra features and benefits. They offer greater capacity; up to 13 place settings, use less water, are quieter, and boast more features than our value models. In fact, our AquaStar model is a record breaker, using just 6.5 litres of water and only 0.92kWh of electricity, rating it as A++.

Avantixx ActiveWater

Added value models with a good selection of features at a good price. They boast more features than the Classixx models such as an Auto 55–65°C programme, additional options, 3-stage Rackmatic™ basket system and can accommodate up to 12 place settings.

Classixx

Simple, practical models offering Bosch build quality and value for money. They still feature the triple-A rated performance that comes with all our dishwashers, and a host of useful features, including a large item spray head.

The world's most environmentally friendly dishwasher.

Always at the forefront of water saving technology, Bosch ActiveWater dishwashers now use even less water than ever – only 6.5 litres*. With water consumption at an all time high, it is more important than ever to choose a dishwasher that helps preserve our most precious resource.

ActiveWater

ActiveWater technology from Bosch is a revolutionary new dishwashing system that gets the maximum use out of each and every drop of water. This incredible increase in efficiency has been achieved through maximising water efficiency in the rinse cycles, faster heating-up, targeted water circulation and improved pump performance meaning that the new ActiveWater dishwashers use less water, less energy but with increased performance.

Green Technology inside

Look out for this new Bosch energy efficiency symbol as it is there to help you identify our most energy efficient models. You will see it next to our AquaStar and Logixx models with VarioDrawer.

Less water

Our new AquaStar dishwasher uses only 6.5 litres* of water to wash 13 place settings on a standard Eco 50°C programme – every time. This compares to a staggering 49 litres of water if you washed-up the same load by hand. But our new ActiveWater technology isn't restricted to just one model, it's available on selected models throughout our Logixx, Exxcel and Classixx ranges.

Less energy

Our new ActiveWater dishwashers not only save water but they lead the way on energy consumption too. Our Aqua-Star model uses just 0.92kWh on a standard 50°C Eco programme which is 29% less energy than an equivalent Bosch dishwasher of 15 years ago. Now every household can not only save money but actively protect the environment too.

More performance

ActiveWater technology not only saves water and energy but also increases the performance of the machine with the faster heating-up times, optimum water circulation and improved pump performance. All Bosch ActiveWater dishwashers deliver an A wash and A drying performance every time.

*6.5L water consumption in the Economy 50°C programme.

Bosch dishwasher programmes.

Designed to make your life easier – Bosch dishwashers offer the ultimate in wash performance. A range of different programme options ensure that the wash and rinse cycles are tailored to the load.

Pre-rinse

For rinsing dishes prior to the main wash, and can be used to prevent odours when storing dirty dishes over night.

Normal 65°C

A daily wash programme for a normally soiled mixed load.

Delicate 40°C

A gentle wash, perfect for delicate crockery and glassware.

Economy 50°C

The most efficient and eco-friendly programme, it uses less energy and water but gives the same A-rated cleaning results.

Quick wash 45°C

A shorter wash cycle without drying – perfect for entertaining, or when the tableware is only lightly soiled.

Auto delicate 35–45°C

A gentle sensor-controlled wash programme for delicate tableware. The sensors adjust the programme according to the amount of soiling.

Auto daily 45–65°C

A daily sensor-controlled wash programme for a normally soiled mixed load. The sensors adjust the programme according to the amount of soiling.

Auto intensive 65–75°C

A sensor-controlled wash programme designed for heavily soiled, burnt-on pots and pans. The sensors adjust the programme according to the amount of soiling.

**Hygiene Extra**

Select the Hygiene Extra option for a hotter final rinse – perfect for cooking utensils, glass jars, chopping boards and baby bottles.

Extra Dry

The Extra dry option is designed specifically for plastic items like Tupperware, picnic ware, and baby bottles. These items do not hold as much residual heat after the wash process as crockery and glassware, and therefore require a higher drying temperature to ensure they come out clean and dry.

**Speed Perfect**

The Speed Perfect system optionally reduces programme times by up to 50%, but without compromising on quality. So you still get hygienically clean and dry dishes, but in as little as half the time – ideal for busy households and when entertaining.

Intensive Zone

Cleans heavily soiled saucepans and fragile items at the same time. The bottom basket receives an extra-intensive wash, perfect for pans, burnt casserole dishes and caked-on stains, whilst the top basket programme carries on as normal so that you can load it as you always would, with no risk to fragile glasses.

**Half load**

If you don't have enough for a full load and can't wait, simply load up to half the dishwasher with crockery, plates, pots and pans anywhere in your dishwasher, select the programme temperature and press the half load button. The programme time is reduced and up to 30% less water is used.

Bosch recommends Finish

Use Finish to get amazing results every time you open your Bosch dishwasher. Finish have a complete range of products to suit your dishwashing needs, including new Finish Quantum which combines the power of three separate ingredients in one single product to give you amazing shine and clean. A range of enhancers are also available such as Finish Intensive Clean & Care Dishwasher Cleaner which removes grease and limescale to maintain your machine's performance and give you perfect results in every cycle. Bosch recommend you always use salt in your dishwasher.

More flexibility. More capacity – up to 14 place settings.

Our new basket designs offer more flexibility than ever before. Our Logixx model features the unique VarioDrawer which replaces the standard cutlery baskets and creates space for up to 14 place settings. All baskets feature foldable racks and the 3-stage Rackmatic™ system makes adjusting the height of the basket a breeze.

Vario, Varioflex or VarioFlexPlus baskets with Rackmatic™

With the enlarged loading area, the Bosch basket systems featured in the Exxcel and Logixx models offer more capacity, up to 14 place settings, and greater flexibility. With up to six foldable racks the system can be adapted to any load, and all items are assured a firm, secure place in the protective racks. The new 3-stage Rackmatic™ system makes it a simple matter to adjust the height of the upper basket, even when it is fully loaded – normally a cumbersome task. With three different loading heights a large variety of plates, glasses and other dishes can easily be accommodated.

The VarioDrawer

A unique feature of our new top-of-the-range Logixx dishwasher interior is a third loading level – the new blue VarioDrawer. It replaces the cutlery basket, freeing even more space in the bottom basket. The VarioDrawer is easily removable to allow loading and unloading of cutlery, and there is even room for espresso cups and kitchen utensils. And what's more, even with the drawer in place you can still load long-stem wine glasses in the upper basket.

14 place settings

There is enough space for 14 full place settings in the Logixx ActiveWater dishwasher with VarioDrawer. Or, put into figures: 14 dinner, soup and dessert plates, 14 cups and saucers, 14 glasses and 14 cutlery settings – knife, fork, soup, tea and dessert spoons, plus 1 oval serving plate, 2 serving bowls, 2 serving spoons, 1 serving fork and 1 sauce spoon.

Large item spray head

The large item spray head makes light work of baking trays or oven shelves, without the need for pre-soaking. Simply remove the upper basket, attach the large item spray head, and get powerful cleaning where you need it. The large item spray head comes as standard with all Bosch dishwashers – and on Exxcel and Logixx models, it's now even larger.

Hard working technology that gives you peace of mind.

Advanced technology gives you sparkling dishes every time, using the absolute minimum of energy and water. Bosch dishwashers are also the quietest in the world, so you can relax while your dishwasher quietly does all the hard work.

EcoSilence

Noise pollution affects all of us, even if we are not aware of it. Research shows that a quieter environment is a less stressful environment. Bosch is committed to making your life that little bit easier and we are proud to be able to offer the quietest dishwasher in the world*. At only 38dB, the EcoSilence dishwasher is quieter than a low conversation, so you will barely notice it working away in the background, allowing you to relax in a quieter kitchen.

Top energy performance

At Bosch we are aware of the importance of energy efficient and environmentally friendly appliances. We are so confident of the quality and efficiency of our dishwashers that we offer AAA rated appliances in all our full size and slimline models plus our compact models are all rated A for energy, A for wash performance and B for drying – making our models the most efficient in the world.

*38dB in the Economy 50°C programme. August 2010.

HydroSensor III

Checks the degree of soiling in the prerinse water and decides whether it is clean enough to be used for the main wash cycle. If the water contains only a small amount of soiling, the water is reused. Around 20%, or 4 litres, of water can be saved using the HydroSensor.

Heat exchanger

The unique heat recycling reservoir maximises performance by using heat that is generated in the main wash to pre-heat cold water used for the rinse cycles before it enters the dishwasher. Preheating the water minimises the risk of thermal shock which can occur when cold water strikes warm delicate items which can cause cracking or breakages. As an additional benefit this system is also an extremely energy efficient method of heating the water.

5 spray levels

The uniquely designed curved spray arms distribute water precisely and effectively, ensuring perfect results every time. The water is sprayed on five different levels for maximum performance, including a downward spray to ensure that the filter area is kept permanently flushed clean.

AquaMix

Bosch AquaMix allows you to wash your delicate glasses with complete confidence. By regulating the level of water hardness in the machine and topping up with water directly from the mains it produces the best water hardness level for glass, ensuring a sparkling finish every time.

DosageAssist

The DosageAssist feature on our dishwashers maximises the effectiveness of detergent tablets. The detergent dispenser is conveniently located in the centre of the top of the door, where it is protected from food remnants that drip whilst loading the dirty dishes. At the beginning of the wash cycle, the tab drops into a special tray in the top basket where its dissolving is controlled to ensure outstanding results. This prevents tabs dropping down between plates or cutlery, or not dissolving completely, resulting in a less-than-perfect cleaning performance.

Detergent aware

No matter which detergent you use – 5in1, 4in1, 3in1, 2in1 tablets or separate components – all our dishwashers will adjust the cycle to ensure that you always get the best possible results – every time. (Note that to ensure these results dishwasher salt should always be used).

Advanced filter system

Our easy to remove and clean filter system now has 50% more surface area. This allows for up to 15% more water to be circulated through the system, so that even more cleaning power can be squeezed from every drop of water.

Logical control

All of our dishwashers feature water supply, salt and rinse-aid indicators, as well displaying remaining programme time and start time delay.

AquaStop 24-hr flood protection

All Bosch dishwashers have flood protection systems, but for added peace of mind our Logixx model features 'AquaStop', a device that cuts off the water supply in the case of leaks, and a safety water valve to guard against siphoning, even when the machine is switched off.

Safety lock

Most of our dishwashers feature a lock which prevents the door from being opened during operation, while selected models also feature tamperproof controls, to stop little fingers interfering while the machine is running.

The first dishwasher for people who have no room for one.

Our new range of ActiveWater compact dishwashers put an end to dishwashing by hand, no matter how small your kitchen is.

Compact and bijou

Designed especially for small kitchens and households, they are ideal when there isn't space for a full-size dishwasher or if you need an additional overflow dishwasher. They are also a great option for offices and holiday homes. Their compact dimensions make them extremely practical. Not much bigger than a microwave, they can sit on a worktop or shelf and their good looks will enhance any kitchen design. Available in five colours – white, red, yellow, silver inox and black – there's something for everyone. Perfect for everyday use, they help to keep the kitchen clean and tidy, with dirty dishes out of sight and out of mind.

**Compact and efficient**

The new Bosch ActiveWater compact dishwashers are the first compact dishwashers on the market to be awarded an A-rating for energy efficiency. And thanks to our ActiveWater technology they are amongst the most economical in the world, using every drop of water to maximum effect. In fact, they are far more energy efficient than washing-up by hand, using as little as 7 litres of water for a full load compared to 24 litres for washing up the same load by hand.

**Compact yet spacious**

Their cleverly designed interior allows room for 6 place settings (51 items). They feature 5 programmes including a 29 minute Quick Wash. And as you would expect from Bosch, the new ActiveWater compact dishwashers are rated A for wash performance.

We would recommend our dishwashers are connected to the mains water supply where possible, however they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmol/liter (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information.

Water pressure required: 0.5-10 bars, flow rate 10 litres per minute. All models comply with COMMISSION REGULATION (EC) No 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption. **Data in this table valid as of April 2011.** Subject to modification without prior notice.

We would recommend our dishwashers are connected to the mains water supply where possible, however they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmol/liter (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information.

Water pressure required: 0.5-10 bars, flow rate 10 litres per minute. All models comply with COMMISSION REGULATION (EC) No 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption. **Data in this table valid as of April 2011.** Subject to modification without prior notice.

 **BOSCH**

Refrigeration.

Logixx

Our premium range, with exceptional cutting-edge features and extras. A beautiful combination of high convenience technology and intelligent design, from the revolutionary storage solutions of the Easy Access under counter fridge, to the advanced food preservation technologies of our Logixx fridge freezers such as the Chiller Box, and separate cooling circuits for precise temperature control. And, for the first time ever, two new frost-free fridge freezers rated an amazingly low A++ for energy.

Exxcel

Mid-range models with a broad range of extra features and benefits. With auto defrost in all our fridges and frost-free systems, you never have to worry about defrosting the fridge or freezer again. State-of-the-art features such as SuperFreeze function and MultiAirflow Cooling, and clever food storage ideas like the Big Box and bottle rack. Range also includes an exceptionally low energy A++ upright fridge and A++ upright freezer.

Avantixx

Added value models with a good selection of features at a good price. Stylish new designs with sleek, contemporary flat doors and covered hinges in a choice of white or stainless steel look. All three fridge freezers are extremely energy efficient boasting an A++ rating, with electronic temperature control and LED lighting.

Classixx

Simple, practical models offering Bosch build quality and value for money. All Classixx fridge freezers feature are now rated A+ for energy and feature a CrisperBox for longer-lasting fruit and vegetables. The convenient Low Frost feature reduces defrosting time by half.

Cutting-edge technology that cuts energy costs too.

At Bosch we take energy efficiency very seriously, and we work hard to make our cooling products some of the most energy-efficient performers in the industry.

Save energy with a Bosch fridge or freezer

Unlike your washing machine or dishwasher, your fridge or freezer is on 24 hours a day, so it is especially important that the appliance does not waste energy. With the exception of the wine coolers, every model in the range has been awarded at least an A+ in the EU Energy Efficiency rating scheme. Using as much as 20% less energy than equivalent A-rated models, and we even offer eight super-efficient models with an A++ rating that use up to 40% less energy than an equivalent A-rated model.

Longer lasting food is good for the environment

Thanks to the advanced technology incorporated into each and every Bosch refrigeration appliance, food stays fresher for longer. That means less food ends up in the rubbish bin. Plus more food can be bought in bulk, which means fewer shopping trips, and so less waste of natural resources.

Look out for this Bosch energy efficiency symbol as it is there to help you identify our most energy efficient models. You will see it next to all our cooling products that are rated A++.

Our refrigeration products are packed full of good ideas.

On average we throw away one third of all the food we buy. That equates to 6.7 million tons of food every year, enough to fill Wembley Stadium eight times!* Bosch refrigeration products are packed with innovative features and storage solutions to keep food fresher for longer. Meaning that less food ends up in the rubbish bin, which is good for the environment as well as your pocket.

*Source: Wrap – The Food We Waste, Executive Summary, 2008

Separate cooling systems

Separate evaporators for the fridge and freezer sections not only prevents the transfer of flavours, but also allows the fridge and freezer temperatures to be controlled separately.

Active Cooling

The temperature within a conventional fridge can be uneven, since warmer air rises. Bosch Active Cooling solves this problem by blowing cold air into all areas of the fridge by fan or rear wall venting. Sensor electronics maintain a constant temperature throughout the compartment to $\pm 1^{\circ}\text{C}$. Your food is protected against bacterial growth, and is kept fresher for longer.

Electronic temperature control

Beautifully designed user-friendly integrated control panel for precise temperature setting, with independent control for the fridge and freezer, at the touch of a button.

MultiAirflow Cooling

Greatly improves circulation of air around the fridge, regulating temperature and humidity levels, and eradicating condensation build-up, so that your food stays fresher for longer.

SuperCool

Putting new food into your fridge causes the internal temperature to increase, so your fridge has to work harder to cool down, and the food already stored in there can get warmer. SuperCool will prepare your fridge by rapidly reducing the temperature, keeping the contents cool, and quickly cooling the new groceries down to 2°C .

SuperFreezing

Adding new food to the freezer raises the internal temperature, and the freezer has to work harder to avoid food already in there warming up, and possibly even part defrosting. The SuperFreeze function rapidly lowers the temperature in the freezer, ensuring that the fresh food is frozen quickly, while surrounding frozen food stays frozen. So even when the door is open for longer periods, the contents are protected.

Frost free

Available on selected models, including three of our super-efficient A++ models. This innovative system eliminates the formation of ice on food and the freezer interior, meaning you never have to worry about defrosting again. Intelligent electronics ensure that the defrost operation is only initiated when the appliance actually needs it.

Auto defrost

Automatically defrosts the fridge at regular intervals without the need to switch off the appliance or remove the food stored.

**** freezer compartments

Bosch freezer compartments allow food to be stored below -18°C so that it can be stored for longer. As it is a 4 star compartment you can freeze fresh food.

Low Frost

This convenient feature means that there is 50% less ice creation on the freezer housing walls, reducing the time it takes to defrost by 50%. A drainage nozzle for thaw water makes it even easier for you, making defrosting quicker, easier and cleaner by half.

LED lighting

Brilliant, even light to help you see inside the whole fridge interior more clearly, ensuring that you use your fridge space as efficiently as possible. Elegantly integrated into the top of the fridge compartment, the light is unlikely to be blocked by food, giving you constant illumination every time you open the fridge door.

Holiday mode

If you are going away, you can switch your appliance over to the energy-saving holiday mode. Using this function, the temperature in the fridge compartment (not the freezer compartment) is automatically set at $+14^{\circ}\text{C}$.

Humidity control

The humidity control vent gives you the option to lower or raise the humidity in the vegetable/salad container, depending on the food you're storing. High humidity keeps leafy vegetables fresh for longer. All other vegetables and fruit should be stored at a slightly lower humidity. For high humidity, close the vent and for low humidity you should keep the vent open.

A place for everything...

Those who appreciate quality and freshness in food know that good storage makes all the difference. It is important therefore, to know how best to stock your fridge. Thanks to the clever designers at Bosch there is a dedicated storage space for every type of food and drink. And, in combination with the very latest in refrigeration technology, Bosch fridges and freezers offer you the best possible conditions for long term storage and freshness.

Storage solutions

Top shelves

The best place to store hard cheeses, ready meals, cured meat or fish products and drinks.

Upper door racks

The highest temperature level in the fridge, just right for butter, margarine, jams, salad dressings and hard cheese.

Middle shelves

Perfect for dairy products such as cream, yoghurts and soft cheese, as well as leftovers and opened canned goods.

Middle door rack

Great for condiments and pickles. Eggs are kept safely in place by the built-in egg racks.

Lower shelves

This is the coldest section of the fridge and is ideal for highly perishable foods such as; raw meat, meat products, poultry, fish, seafood and raw egg products.

Lower door rack

Provides a strong and secure home for bottles and tall items that need to be stored upright.

Vegetable/salad container

For long lasting freshness, you need not only the right temperature, but also optimum humidity levels. Our vegetable/salad containers provide excellent storage and humidity conditions for a whole range of fruit and vegetables. A humidity control allows fine adjustment of the humidity conditions, whilst rippled base technology improves air circulation.

NB. The above storage solutions only relate to our models without Active Cooling and MultiAirflow cooling.

... and everything in its place.

When it comes to storage solutions we've thought of everything.

HydroFresh

The HydroFresh vegetable drawer features a humidity control which allows adjustment of the humidity levels to maximise the shelf life of fruits and vegetables. Maintaining the correct humidity level prevents produce from drying out, so that it lasts longer. In fact, fruits and vegetables can be kept up to twice as long. For maximum convenience the telescopic rails allow you to pull the drawer out for complete access.

Chiller Box

The recommended storage area for meat, fish and ready-meals, this high-performance chiller compartment provides a lower temperature than the rest of the fridge, which helps to keep your food fresh, flavoursome and nutritious for longer.

CrisperBox vegetable drawer

Our fantastic new CrisperBox vegetable drawer in the Classixx Avantixx and Logixx fridge freezers offers a bumper 37% more storage space for your fruit and vegetables. The manual humidity adjustment lever also stores them in the ideal environment so that your food stays fresher for longer. And for easy access, we have installed a slide out system so that you can easily assess what's there, even at the back of the drawer.

Pull-out fridge tray

The pull-out fridge tray is suitable for the storage of cold meat, cheese and other small items and can be positioned at any level.

Extendable glass shelves

Our shelves glide in and out effortlessly, enabling you to reach your food from the back as well as the front of the fridge. Available on Classixx and Avantixx fridge freezers.

Bottle racks

The basic shelf-top bottle rack is featured on selected models throughout the range, and allows you to stack up to six wine bottles in a pyramid configuration. Selected models feature the space-saving clip-on chrome bottle rack, which hangs underneath a shelf, or the premium full-width chrome bottle rack.

Dairy compartment

Our new dedicated dairy compartment offers optimum storage conditions for butter and cheese, keeping your food in tip-top condition.

Big Box

This extra large freezer drawer (26cm instead of 18cm high) means you can store bulky frozen goods or stack freezer containers.

Berry tray

Designed for freezing soft fruit individually so that they don't stick together.

The Easy Access range.

A revolutionary storage concept. What makes Easy Access different from any other fridge is that it employs a system of pull-out drawers instead of traditional shelving. Being able to access all items without moving other items or excessive bending down makes this a truly innovative product.

Larger capacity

The new design utilises the interior space more efficiently than in a conventional fridge resulting in 28% bigger drawers and a 30% bigger salad compartment and allows storage of up to eight 1.5 litre upright bottles and six horizontal bottles.

Easier to clean

If anything does spill, the drawers contain liquids so they can't leak to other levels of the appliance. The smooth surface of the drawers is very easy to wipe clean, though the drawers can be removed easily if more thorough cleaning is required.

Excellent visibility

With the pull-out drawer system you can see exactly what you've got in your fridge without having to take everything out first.

Everything has its place

Everything – from bottles, to eggs and butter – is kept safe and securely in place thanks to space dividers and bottle grips.

The big fresh one

This dual-purpose drawer succeeds where traditional fridges fail. Not only does it provide more space for storing fruit and vegetables comfortably, it provides a home for bottles and tall items that need to be stored upright.

Two drawers in one

The ingeniously designed drawer ensures the best use of space within the appliance. The extra-deep section is ideally suited for storing taller items such as tins, bottles or jars while the shallow section creates space for bottle storage in the drawer below.

Frost free fridge freezer KGN36S71 metal behind glass

Performance/ Technical Information

- Energy efficiency class: A+ (294 kWh per year)
- Approximate annual running costs £35.28
- Total net capacity 289 litres
- Net fridge capacity 223 litres
- Net freezer capacity 66 litres
- Freezing capacity in 24 hours: 8 kg
- Maximum freezer storage time in power failure: 17 hours
- Noise level dB(A) re 1 pW: 44
- Climate class SN-T (suitable for ambient temperatures between 10 to 43°C)

Key features

- Frost free freezer
- Auto defrost function in fridge
- Two separate cooling circuits allow independent temperature control and prevents the transference of humidity between the fridge and freezer cavity
- MultiAirflow system – improves circulation of air around the fridge
- ChillerBox – recommended storage area for meat and fish
- HydroFresh – humidity controlled vegetable/salad container on telescopic rails for prolonged storage
- Bright interior LED light
- Removable magnetic door seals – easy to clean and to replace

Additional features

- 3 safety glass shelves in fridge compartment of which 2 are height adjustable
- AirFresh filter – reduces strong odours
- Metal bottle rack
- 3 freezer drawers
- Right hinged door, reversible
- Height adjustable front feet

Functions

- SuperCool function with automatic deactivation
- SuperFreezing function with automatic deactivation
- Door open warning signal: optical and accoustical
- Malfunction warning signal: optical and accoustical

Design

- Metal behind glass door and painted sides
- Electronic control
- Dimensions: 185 cm H x 60 cm W x 65 cm D

Included accessories

- 2 x ice packs
- 1 x berry tray
- 2 x egg trays
- 3 x ice cube trays

American-style Fridge Freezers.

Brilliant masterpieces in XXL format, the Bosch American-style fridge freezers will easily cope with the demands of a large family, and make a bold design statement too.

High capacity with stylish design

Choose from classic steel look, with fingerprint resistant finish; sleek, chic gloss black, or the stunning, premium white glass front model.

Saving a further 20% of energy with A+

The Bosch American-style models set the standard in high-performance refrigeration technology combined with outstanding environmental-friendliness. All models come with an A+ energy efficiency rating which is up to 20% more economical than energy efficiency class A.

In-door electronic controls

All models feature fully electronic controls set conveniently into the door exterior, giving you precise fingertip control of the temperature of both the fridge and freezer compartments.

In-door ice and chilled water dispenser

The in-door ice and chilled water dispenser gives you the choice of chilled, filtered water, crushed ice and ice cubes – up to 140 every 24 hours.

AirFresh filter

The Logixx model features an AirFresh filter. Lasting the lifetime of the appliance, the AirFresh filter ensures that odours in the fridge are reduced, and the transfer of food smells is minimised.

FreshProtectBox

Our top-of-the-range model features a separate compartment with independent temperature control. Conveniently accessible on smooth-running telescopic rails, the multi-purpose FreshProtectBox keeps food items fresher for longer. With 3 temperature settings: 4°C, 2°C and 0°C, it can be used to store different foods like fish, meat, vegetables, fruit or dairy products, at the most appropriate temperature for the food type.

EasyLift safety glass shelf

The EasyLift safety glass shelf on our top-of-the-range model can be raised or lowered without emptying it first – convenient, flexible, easy.

Dazzling illumination

The interiors of our American-style fridge freezers shine with exceptionally bright lighting for optimum viewing.

Separate cooling systems

A separate evaporator for the fridge and freezer sections, not only prevents the transfer of flavours, but also allows the fridge and freezer temperatures to be controlled separately.

¹ EC rating scheme designed to compare energy efficiency of comparable appliances.

² Climate Class SN : Room temperatures +10°C to +32°C
Climate Class N : Room temperatures +16°C to +32°C
Climate Class ST : Room temperatures +18°C to +38°C
Climate Class T : Room temperatures +18°C to +43°C

³  Freezer at -18°C or less, for fresh & frozen food.

⁴ Freezer capacity quoted may only be attained by switching to constant operation and not on a 24 hour basis.

⁵ Temperature increases from -18°C to -9°C, time taken is when appliance is full. When only partially stocked, less time is involved.

⁶ Actual energy consumption will depend on how the appliance is used and where it is located.

As a guideline A++ means very economical, A+ economical, A is average, and B-G represents a high consumption. Consumption rates are quoted to assist comparisons for different appliances. During actual operation, consumption may vary slightly. All cooling appliances require adequate ventilation (min. 200cm²) Please refer to user / installation instructions. Wine coolers require a ventilation distance of 4cm around the appliance for optimum performance on installation.

Data in this table valid as April 2011.

¹ EC rating scheme designed to compare energy efficiency of comparable appliances.

² Climate Class SN : Room temperatures +10°C to +32°C
Climate Class N : Room temperatures +16°C to +32°C
Climate Class ST : Room temperatures +18°C to +38°C
Climate Class T : Room temperatures +18°C to +43°C

³ ★★★★★ Freezer at -18°C or less, for fresh & frozen food.

⁴ Freezer capacity quoted may only be attained by switching to constant operation and not on a 24 hour basis.

⁵ Temperature increases from -18°C to -9°C, time taken is when appliance is full. When only partially stocked, less time is involved.

⁶ Actual energy consumption will depend on how the appliance is used and where it is located.

As a guideline A++ means very economical, A+ economical, A is average, and B-G represents a high consumption. Consumption rates are quoted to assist comparisons for different appliances. During actual operation, consumption may vary slightly. All cooling appliances require adequate ventilation (min. 200cm²) Please refer to user / installation instructions. Wine coolers require a ventilation distance of 4cm around the appliance for optimum performance on installation.

Data in this table valid as April 2011.

Subject to modification without prior notice.

Service you can depend on.

For help with your home appliance, trust Bosch Customer Service.

Reliability guaranteed. No compromises

All Bosch appliances come with a full two year warranty. This warranty can be extended for a further three years (total 5 years) with a protection plan which covers parts, labour and call out charges for an unlimited number of breakdown repairs and also extends your warranty to include accidental damage.

Speedy response

Our customer's time is valuable and so we react quickly, with Bosch engineers based across the country.

Quality service straight from the original manufacturer: Bosch

A technical team analyses all repairs in advance to select the placement parts needed. These are then shipped to the engineer's van the night before the visit so that the correct parts are ready to complete the repair on the first visit. Only original Bosch parts are ever used and are kept in stock for ten years – often longer.

Lifetime service goes without saying at Bosch

Once your guarantee period is over, we are still there to assist you. You can rely on expert care and first-rate service throughout your appliance's life cycle. From missing instruction manuals to appliance repair – we take care of everything. A promise is a promise!

For our 24 hour warranty helpline: 08706 000535**

Top customer service award

Bosch proudly holds the Domestic and General'sTEQ (Total Excellence & Quality) Award 2010. In a comprehensive customer service survey carried out by D & G, one of the UK's largest insurance companies specialising in domestic repairs, Bosch Customer Service came out on top against other leading manufacturers.

In 2011, the Bosch Group is celebrating a double anniversary: the 125th anniversary of the company's establishment, and the company founder's 150th birthday. This is cause for more than mere retrospection – it prompts us to show how the company's past fuels its future. The history of the company has had its ups and downs, but at the same time has always been vibrant. We see this history as one that drives us forward to new – and above all beneficial – achievements.
